

Pushback Vehicles Fact Sheet

Preventing Caught In Between Injuries

Purpose: To prevent caught in between injuries while operating pushback tugs.

Positioning Tug To Aircraft

Potential Hazards:

- Obstructed view
- Equipment malfunction
- Surface conditions
- Ramp congestion (equipment, baggage or debris)
- Poor lighting
- Connecting towbar
- Distraction

Possible Solutions:

- Use properly positioned guide person for connecting towbar and towbar-less capture [Figures 1-3]
- Maintain communication/awareness between driver and guide person
- Perform safety stops while approaching aircraft
- Discontinue approaching aircraft when safety critical equipment malfunctions
- Maintain appropriate speed
- Maintain situational awareness and keep focused on task
- Report poor lighting conditions
- Wear proper foot wear
